- Static-Electricity Resistant Packaging

- Cautions

1. Store and use where there is no force causing transformation or change in quality.
2. Store and use where there is no corrosive gas or sea (salt) breeze.
3. Store and use where there is no extreme humidity.
4. Solder the lead-pin within the condition of ratings. After soldering do not add extra force.
5. Do not wash this device. Wipe the stains of diode side with a soft cloth. You can use the solvent, ethyl alcohol or methyl alcohol or propylene only.
6. To prevent static electricity damage to the Pre-AMP make sure that the human body, the soldering iron is connected to ground before using.
7. Put decoupling device between Vcc and GND for reduce the noise from power supply line.
8. The performance of remote-control system depends on environments condition and ability of peripheral parts. Customer should evaluate the performance as total system in those conditions after system up with components such as commander and this receiver module.
9. This device is not design to endure radioactive rays and heavily charged particles.
10. In case where any trouble or questions arise, all parties agree to make full discussion covering the said problem.
